

Intro Notecard – CS 3210

Devin Fromond

I am taking this course to graduate, but I have always been interested in sys/arch because the why and the how interests me. I chose this class over Intro to SWE since I do not want to program every day of my life when I get out of college. I want to understand how things work... I think those are two distinct things.

As for a quick blurb, I was on the GT Lacrosse team for my first two years... now I swim (recreationally). I work at PACE (GT's HPC... which hosts ICE (that's usually the buzzword)) developing their accounting system.
